The Duke of Burgundy

A close-up photograph of a Duke of Burgundy butterfly perched on a green leaf. The butterfly's wings are brown with white spots and markings. The background is a soft-focus green.

The Duke of Burgundy butterfly feeds on primroses growing in dappled sunlight, with a number of colonies in chalk and limestone grassland but the reduction of coppicing in woodlands has had a marked effect on this species.

*An illustrated talk by **Sarah Meredith**
Butterfly Conservation project officer*

Wednesday, 21st October | 7.30pm–9pm
Dunstable Community Fire Station Lecture Theatre
Brewers Hill Road, Dunstable LU6 1AA

Entry by Donation – booking essential!
